

Weekly Report Year (2026)

Name: Mahima Rath

Position: Full Stack Developer

Project Name :Smart Hometutor

Contact No: 6306605247

Mail: mahimarathi36@gmail.com

Introduction:

This report provides a comprehensive overview of the activities, performance, and progress for the Week of **Aug, 2025**. It highlights key achievements, challenges faced, and areas for improvement while analyzing key performance indicators (KPIs) relevant to our operations.

The purpose of this report is to assess our monthly performance against set goals, ensure transparency in operations, and facilitate data-driven decision-making. Additionally, it outlines strategic plans for the upcoming month to enhance efficiency and productivity.

Executive Summary:

WEEKS/ DATES	PROECTS/TASKS (Time Slot)
Day 1, Date: 17/08/26 (Mon)	Task 1: Worked on the Admin Dashboard and fixed existing issues to improve overall functionality. Task 2 : Added and configured the Notification Section in the Admin Dashboard. Task 3: Fixed and improved the User Directory to ensure proper user management.
Day 2, Date: 18/08/26 (Tue)	Task 1: Worked on the Certificate Approval section, enabling the admin to review and manage certificate approval requests. Task 2: Updated and managed the Subject Section in the Admin Dashboard. Task 3: Tested the updated admin-side sections and resolved identified issues.
Day 3, Date: 19/08/26(wed)	Task 1: Worked on the Blog Articles section, enabling the admin to manage blog-related content effectively. Task 2: Fixed and enhanced the Announcement Section. Task 3: Implemented the functionality allowing the admin to create and send announcements across all relevant panels.
Day 4, Date: 20/08/26(Thur)	Task 1: Worked on the Tutor Dashboard and managed the Teaching Session functionality. Task 2: Improved the Class Schedule section for managing tutoring sessions. Task 3: Worked on Student Requests and ensured the required request management flow

	was functioning properly.
Day 5, Date: 21/08/26(Fri)	Task 1: Worked on the Student Dashboard's Homework and Notes section. Task 2: Implemented and refined the functionality for managing and sharing homework and notes. Task 3: Worked on the Student-Tutor Chat System and tested message communication functionality.
Day 6, Date: 22/08/26(Sat)	Task 1: Performed testing of the updated Admin, Tutor, and Student dashboard functionalities. Task 2: Fixed UI and functional issues identified during testing. Task 3: Verified notifications, announcements, user management, certificate approval, blog, subject, class schedule, homework, notes, student requests, and chat-related functionalities.

Future Aims:

Aim:	Continue testing and monitoring the platform to identify and resolve any remaining issues and improve the overall functionality and user experience.
------	--

Challenges:

- Managing multiple role-based functionalities across Admin, Tutor, and Student dashboards.
- Ensuring announcements and notifications are correctly displayed across the relevant panels.
- Maintaining proper data flow between certificate approvals, user management, subjects, and blog content.
- Managing communication and data sharing between students and tutors through requests, homework, notes, and chat.
- Testing interconnected dashboard functionalities without affecting existing features.

Conclusion:

During this week, significant improvements were made across the Admin, Tutor, and Student dashboards of the Smart HomeTutor Platform. Admin-side functionalities including notifications, user directory, certificate approvals, subjects, blog articles, and announcements were enhanced and managed effectively. Tutor and Student functionalities such as class schedules, teaching sessions, student requests, homework and notes, and the chat system were also implemented and refined. The updated modules were tested to ensure proper functionality and smooth interaction across the platform.
